

# Queensland National Action Plan Implementation Arrangement

The *Queensland Freight Strategy* (QFS) sets a shared vision for Queensland's freight system outlining a series of commitments that will guide policy, planning and investment of the next ten years to give customers greater choice and support economic growth.

The QFS will address Queensland's growing freight task in a safe, equitable and collaborative way. It will be implemented through the rolling two-year *Queensland Freight Action Plan* (QFAP) that outlines how government and stakeholders are ensuring the freight system continues to keep pace with new technologies and economic conditions.

The QFAP forms Queensland's plan for the implementation of the National Action Plan (NAP). Queensland's commitments to national freight agenda expressed in the NAP are committed elements of the QFAP. Reporting arrangements for implementation of the QFAP are consistent with the *National Freight and Supply Chain Strategy Performance Monitoring Framework*.
